

Oregon Dunes

Honeyman State Park

Sand dunes in Honeyman State Park on the Oregon coast. At Honeyman State Park, sand dunes marching inland are surrounding and preparing to bury islands of forest, while behind them beach grass and scrub pines are colonizing the sand. Cleawox Lake has formed as the moving sand blocked the outlet to a coastal stream. This enhanced 3D image is a composite of lidar-derived shaded relief and orthorectified aerial photography.
