

# **EARTHQUAKE!**

## **HOW TO SURVIVE AN EARTHQUAKE**

Earthquakes are unpredictable.  
You must be ready anytime.  
When you feel an earthquake:

### **DROP**

**Drop to the ground. You want to avoid flying objects.**

### **COVER**

**Find something sturdy to get under, like a desk or table. If nothing is available, get close to a wall and cover your head.**

### **HOLD**

**Hold on and keep down. Stay there until the shaking stops.**
